## ♥ General Plan Design

### Client Approval Sign-off

This benefit plan summary is part of the Plan Design Document referred to in Client's Prescription Benefit Services Agreement with [Caremark, L.L.C./Caremark PCS Health, L.L.C.] and accurately reflects the Client's plan design requirements for the prescription drug benefit program to be administered by CVS/Caremark TM under that Agreement.

I have reviewed the documentation and conclude all information to be correct. (All signatures below are required)

<b>NON-PREFERRED BRAND - TIER 3</b>		\$30.00	N/A	N/A	N/A	

\*Copay applies to all drugs in specialty contract at all network pharmacies

**Dispense as Written (DAW)**

DAW can be noted on any prescription and means the pharmacist cannot meet a substitution and must dispense the exact drug to the member.

This means that the less costly generic alternative, which may be clinically viable option for the member, cannot be used. To positively influence both members and physicians to make cost-effective choices, DAW penalties apply a cost penalty to member when a multi-source brand (MSB) medication is dispensed by request over available generic equivalents and can increase generic utilization.

DAW rules apply to ALL drugs, including Specialty, unless otherwise specified.

DAW penalties will apply to ALL delivery channels except paper reimbursement claims due to pharmacy limitations.

For plans with Value Formulary: DAW penalties are not allowed on VF Standard Plans, however, they are permissible on VF Incentivized plans.

CVS utilizes a select list of brand drugs that process at a lower cost to reduce health care expenses. The DAW5-Substitution Allowed Brand Drug Dispensed as a Generic Drug is opt in strategy for mail and Maintenance Choice unless otherwise specified.

DAW Penalty will only apply when there is a MAC cost available

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

Physician DAW (DAW1)	Member DAW (DAW2)
No penalty to member. Client will pay the cost of the brand name drug. Plan member will pay the Brand cost share for the drug.	No penalty to member. Client will pay the cost of the brand name drug. Plan member will pay the Brand cost share for the drug.

**Claim Maximum****Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**
☒ Electing a claim maximum

Day Supply	Claim max applies to	Claim max amount	Claim max rule limits	Reject message when claim max is reached
<b>MAIL</b>				
90	All Drugs	\$4,000.00	Client Exposure	Non-SRX-claim \$ amount exceeded
<b>RETAIL</b>				
90	All Drugs	\$4,000.00	Client Exposure	Non-SRX claim \$ amount exceed

When Exclusive specialty benefit is selected Claim Maximum is not applied to Specialty products.

**Refill Threshold****Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

The percent of day supply that must be used before a system will allow a refill. CVS standard defaults are 75% for Retail/Mail. Approval is required to edit standard defaults.

Delivery System	Day Supply	% of Day Supply used
Retail	30	80%
Mail	90	80%

Controlled substances refill threshold is 80%

## Point of Sale DUR

Plan(s): BENSALEM PLAN1 OC1, BENSALEM PLAN2 OC3, BENSALEM PLAN4 POS, BENSALEM PLAN5 OC2

<input checked="" type="checkbox"/>	Electing Point of Sale DUR
-------------------------------------	----------------------------

## CVS Proprietary Point of Sale DUR Edits

The edits listed below are automatically added for Employer clients unless opting out. Any deviation from the standard edits will require an opt-out and custom request.

A message will alert the pharmacist to the edit but will not cause the claim to reject.

A soft reject will cause the claim to reject, but the reject can be overridden by the dispensing pharmacist.

A hard reject will cause the claim to reject, with no option for override or prior authorization.

If POS HIV DUR program is found, then it will be removed as part of this request.

CVS Proprietary Point-of-Sale (POS) Edits	Reject Acronym	Reject/ Alert	Intervention Type POS DUR Activity Report	Description	Code
Drug-Diagnosis Caution	DIAGCAUT	Message	Drug - Disease Precaution Drug – Pregnancy Alert	This edit “messages” the pharmacist when contraindications based on diagnosis is identified.  Identifies contraindications based on the member’s diagnosis. These contraindications are classified as either absolute, potential, or precautionary.	N/A
Cumulative Acetaminophen Edit	APAPCHEK	Soft Reject	Cumulative APAP Check	While the current Medispan maximum daily dose edit (dose check) and quantity limits imposed by the formulary captures members taking more than the maximum daily dose of acetaminophen within a single prescription, the cumulative acetaminophen (cAPAP) edit will identify members exceeding 4 grams (4,000 mg) of acetaminophen across different drugs by calculating the cumulative “acetaminophen ingredient” contribution across multiple active APAP-containing prescriptions (tablets and liquids). The historical look back period will ensure that the days’ supply will overlap with APAP-containing products presented at the point of sale.  Soft Reject 88 – PPS CODE REQD: APAP EXCEEDS 4 GM/DAY.	Reason for Service Code: AT
Max Dose Edit Note: This is an enhanced version of dosing/duration edit.	DOSECHEK	Soft Reject	Dose Check Multiplier	The purpose of this edit is to identify doses of medications that greatly exceed the U.S. Food and Drug Administration (FDA) -approved maximum dose. While the base edit triggers at 1.25 times the maximum daily dose assigned by Medispan (which is not necessarily set at the FDA-labeled max dose) and returns a message response, this enhanced functionality adds a multiplier that is configurable to the Medispan maximum daily dose edit. The purpose of this multiplier is to identify egregiously high doses at the point of sale. The default value for the multiplier has been selected at “5” times the maximum daily dose for the claim presented at the point of sale. Applies to ALL drugs, not just controlled substances.  Soft Reject 88 – PPS CODE REQD: MAX DOSE EXCEEDED – 5x max.	Reason for Service Code: HD
Multiple Pharmacies Edit	CHKPHARM	Soft Reject	Multiple Pharmacies	Identifies members filling multiple prescriptions within the same drug class (GPI 2) at four or more pharmacies. The goal of this edit is to support a consolidated approach to care by reducing therapeutic duplication, potential drug interactions, and pharmacy shopping. Applies to ALL drugs, not just controlled substances.  Soft Reject 88 – PPS CODE REQD: >=4 PHARMACIES/SAME DRUG CLASS.	Reason for Service Code: DM

CVS Proprietary Point-of-Sale (POS) Edits	Reject Acronym	Reject/Alert	Intervention Type POS DUR Activity Report	Description	Code
Multiple Prescribers Edit	CHKPRESC	Soft Reject	Multiple Prescribers	<p>Identifies members filling multiple prescriptions within the same drug class (GPI 2) by four or more prescribers within past 30 days. The goal of this edit is to support a consolidated approach to care by reducing therapeutic duplication, potential drug interactions, and doctor shopping. Applies to ALL drugs, not just controlled substances.</p> <p>Soft Reject 88 – PPS CODE REQD: &gt;=4 PRESCRIBERS/SAME DRUG CLASS.</p>	Reason for Service Code: DM
Excessive Controlled Substance Edit Note: This is an enhanced version of Excessive Controlled Substance Screening	EXCCCLAIM	Soft Reject	<ul style="list-style-type: none"> <li>Excessive Controlled Substances – Multiple Drugs</li> <li>Excessive Controlled Substances – Number of Therapies</li> </ul>	<p>CVS Caremark has had an Excessive Controlled Substances edit for many years. The “base” edit “messages” the pharmacist when four or more claims for the same controlled substance is prescribed within 90 days. The enhanced Excessive Controlled Substance edit targets more egregious potential controlled substance overutilization than the base edit. The enhanced edit will return a soft reject requiring the pharmacist to enter an override. There are two triggers for this edit:</p> <ul style="list-style-type: none"> <li>Multiple drugs: This edit targets members taking five or more unique controlled substances within a class of drugs (same GPI 2) within the previous 30 days. This edit is not recommended for long-term care (LTC) plans.</li> <li>Multiple claims: This edit targets members filling prescriptions for 8 or more claims for the same controlled substance (GPI 10) within the previous 30 days. This edit is not recommended for LTC plans.</li> </ul> <p>Soft Reject 88 – PPS CODE REQD: MULTI CII-V IN LAST 30 DAYS.</p>	Reason for Service Code: DM
Cumulative Morphine Milligram Equivalent Edit	CMEDCHEK	Soft Reject	Cumulative Morphine Equivalent Dose	<p>Checks for excessive opioid utilization (GPI-65) via cumulative morphine milligram equivalent (cMME) dose across multiple drugs and prescriptions. This edit will identify all active opioid prescriptions in a member’s drug profile and convert the opioid dose to the equivalent dose of morphine. The cMME is calculated as follows:</p> <ul style="list-style-type: none"> <li>MME per day is calculated for each opioid prescription.</li> <li>The cumulative MME is calculated based on all opioid prescriptions in the last 90 days of the member’s claim history that are still active on the day of the new opioid claim.</li> <li>Members in hospice or with a claim for a cancer or sickle cell disease drug in the last 365 days are automatically excluded from this edit. Medicare Part D members in a Long-Term Care facility are also excluded from this edit.</li> </ul> <p>The goal of this edit is to identify potentially dangerous levels of opioid use, including potential misuse and prescriber shopping. The edit will return a soft reject if the cMME dose is greater than 90 mg AND the member has remaining supply of opioid prescriptions from three or more prescribers in the previous 90 days.</p> <p>Soft Reject 922/88 – PPS CODE REQD: EXCEEDS XXXX MME DOSE LIMIT. CONTACT MD.</p>	Reason for Service Code: HC
Buprenorphine /Opioid	EXCLTHER	Soft Reject	Buprenorphine with Opioid	<p>Identifies opioid use after the patient has begun opioid use disorder treatment with a buprenorphine product. The patient should not receive any new opioid Rx after they start buprenorphine. After reviewing the patient’s medication history, the pharmacist will have the option of: (1) filling the Rx as written based on his/her professional judgment or (2) contacting the prescriber to determine a further course of action.</p> <p>Soft Reject 88 – PPS CODE REQD: HX BUPRENORP, EXCL OPIOID</p>	Reason for Service Code: DM
Multiple Long-Acting Opioids	DUPTHER	Soft Reject	Duplicate Long-Acting Opioids	<p>This edit will be set up to soft reject when prescribed drugs have the same therapeutic effects as medication(s) the patient is currently taking.</p> <ul style="list-style-type: none"> <li>Duplicate Therapy (DUPTHER): The Duplicate Therapy Edit checks for two or more medications from the same therapeutic category. If a previous prescription in the same class was dispensed within a given time period of the current prescription, then the alert would be transmitted to the dispensing pharmacy.</li> </ul> <p>Soft Reject 88 – PPS CODE REQD: 2 OR MORE LA OPIOIDS</p> <p>***DO NOT MODIFY THE SOFT REJECT MESSAGE***</p>	Reason for Service Code: TD

CVS Proprietary Point-of-Sale (POS) Edits	Reject Acronym	Reject/ Alert	Intervention Type POS DUR Activity Report	Description	Code
Opioids and Benzodiazepines	DDI-DTMS	Soft Reject	Opioid /Benzodiazepine Drug-Drug Interaction	<p>This edit will be set up to soft reject the pharmacist when interacting drug combinations are identified.</p> <ul style="list-style-type: none"> <li>Checks the member's prescription history for interactions between two or more drugs.</li> </ul> <p>Soft Reject 88 – PPS CODE REQD: DRUG INT OPIOIDS AND BENZO</p> <p>***DO NOT MODIFY THE SOFT REJECT MESSAGE***</p>	Reason for Service Code: DD
Opioid Cough and Cold Products in Children	N/A	Hard Reject		<p>To limit the use of opioid cough and cold medicines containing codeine in children &lt; 12 years of age or hydrocodone in children &lt; 6 years of age because the risk of these medicines outweighs their potential benefits.</p> <p>Hard Reject 60/76 – NO QTY ALLOWED FOR AGE. CONSIDER ALTERNATIVE.</p>	N/A
Codeine and Tramadol Use for Pain in Children	N/A	Hard Reject		<p>To limit the use of codeine or tramadol in children less than 12 years of age. The risk of these medicines outweighs their potential benefits.</p> <p>Hard Reject 60/76 – NO QTY ALLOWED FOR AGE. CONSIDER ALTERNATIVE.</p>	N/A

## Maximum Allowable Benefit (MAB)

Plan(s): BENSABLEM PLAN1 OC1, BENSABLEM PLAN2 OC3, BENSABLEM PLAN4 POS, BENSABLEM PLAN5 OC2

☐ NOT electing a Maximum Allowable Benefit

## Accumulation - Drug Specific

Plan(s): BENSABLEM PLAN1 OC1, BENSABLEM PLAN2 OC3, BENSABLEM PLAN4 POS, BENSABLEM PLAN5 OC2

☐ NOT electing an Accumulation Bypass Rule

## ♥ High Deductible Health Plan (HDHP) Preventive Drug List

Plan(s): BENSABLEM PLAN1 OC1, BENSABLEM PLAN2 OC3, BENSABLEM PLAN4 POS, BENSABLEM PLAN5 OC2

☐ NOT electing HDHP Preventive Drug List

## ♥ Programs/Products

### Specialty

Typically a high cost medication for treating complex, chronic conditions. Often times, these drugs may require special handling, including temperature control. Patients taking these medications may need ongoing clinical assessment to manage challenging side effects. CVS Health addresses today's evolving specialty landscape with a flexible toolkit of drug management strategies, including a range of specialty plan designs. These plan design options can be layered-on with other strategies to help manage specialty trend with more control.

### Specialty Starter Fill Program

This program limits the quantity dispensed for targeted therapies to a 14 or 15 day supply based on product packaging. The program targets high cost therapies that demonstrate poor tolerability due to adverse effects.

Plan(s): BENSABLEM PLAN1 OC1, BENSABLEM PLAN2 OC3, BENSABLEM PLAN4 POS, BENSABLEM PLAN5 OC2

☐ NOT electing a Specialty Starter Fill Program

## Specialty Copay Card Enrollment

### PRUDENTRX

30% member cost share will apply to all specialty drugs dispensed by CVS Specialty for drugs on the PrudentRx drug list. Non-exclusive specialty medications will be processed at the applicable plan member cost share. PrudentRx will help the member enroll in non-needs based assistance cards (copay cards). Non-essential health benefit drugs will bypass and not contribute to the member's out of pocket. Specialty grace fills will not apply. If Non-CVS Specialty Pharmacy is included, will require pharmacy inclusion into network for PRx COB Override Plan.

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☒ Electing PrudentRx with EES with Fertility and HIV - without HSA

## Refill Restrictions

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☐ NOT electing refill restrictions

## ScriptSync

ScriptSync® is a pharmacy capability from CVS Health that aligns a member or caregiver's maintenance medication fill schedules making it easier for them to stay on the therapies they need to effectively manage their conditions.

ScriptSync at retail will allow you to pro-rate copays for less than retail max day supplies

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☒ Electing ScriptSync

## Caremark Cost Saver

Caremark Cost Saver Program utilizes a third-party contracted retail pharmacy network to enable plan members to take advantage of lower discount card prices, when available, while retaining the benefit of the drug utilization and clinical programs provided under the plan.

Note: Amounts paid by members for Cost Saver Program claims will apply to plan deductible and out-of-pocket maximum accumulations, if applicable.

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☒ Electing Caremark Cost Saver

## RxSavingsPlus for Non-Covered Drugs

RxSavingsPlus for Non-covered Drugs allows plan members to purchase certain medications not covered under the prescription plan at the full discounted cost.

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☐ NOT Electing RxSavingsPlus for Non-Covered Drugs

## Drug Efficacy Study Indicator (DESI) Coverage Exception

DESI Indicator Code: Identifies a drug's involvement in the Drug Efficacy Study conducted by the Food and Drug Administration (FDA).

The DESI Indicator plan edit allows coverage to be restricted for products based on their DESI Indicator code rating.

Plan(s): BENSALAM PLAN1 OC1, BENSALAM PLAN2 OC3, BENSALAM PLAN4 POS, BENSALAM PLAN5 OC2

☐ NOT Electing DESI Coverage Exception

## ♥ Drug Coverage

### Drug Coverage Options

Plan(s): BENSALAM PLAN1 OC1, BENSALAM PLAN2 OC3, BENSALAM PLAN4 POS, BENSALAM PLAN5 OC2

☒ Plan has drug coverage options

Core Compound Services	Coverage	Custom claim message
CVS Core Compound Service	Covered	N/A

If electing CVS Compound Core Service, then Non-Core Compound Services section does not apply

The Compound Core Service includes exclusion of costly bases, bulk compounding ingredients, compounding kits, hormone replacement bulk ingredients, OTC products within compound (if client covers OTC's), etc. and Prior Authorization (PA) for compounds exceeding a \$300 threshold. Note: Certain, but not all IVs, Antibiotics and Anti-Infectives bulk ingredients are automatically covered. If client wishes to elect a different PA threshold with the Compound Core Service, refer to CPM form.

The Compound Service will be subject to CVS Caremark mandatory auto-update process.

- This process allows the addition of new drugs and/or edits, changes to existing drugs and/or edits as well as removal of drugs and/or edits when deemed clinically appropriate.
- Auto-update is mandatory for any standard criteria selected by the client.
- Auto-update is not available for any custom edit or criteria requested by the client.

Fertility: Injectable	Covered			
Fertility: Oral	Covered			
Growth Hormone	Covered			

The following ARE COVERED, unless specified otherwise:

- All legend drugs are covered unless specified otherwise in this Drug Coverage Options section.
- DESI drugs - These drugs are determined by the FDA as lacking substantial evidence of effectiveness. The DESI drugs do not have studies to back up the drugs' uses, but since they have been used and accepted for many years without any safety problems, they continue to be used in today's market place.
- Controlled substance 5 (CV) OTC's are covered. (Examples: Robitussin AC syrup and Naldecon-CX) Federal law designates these medicines as OTC. However, depending on certain state pharmacy laws, the medicines may be considered legend prescription medicines and are, therefore, all covered.
- Single entity vitamins - These vitamins have indications in addition to their use as nutritional supplements. For this reason, we recommend covering these medicines. Single entity vitamins are used for the treatment of specific vitamin deficiency diseases. Some examples include: vitamin B12 (cyanocobalamin) for the treatment of pernicious anemia and degeneration of the nervous system, vitamin K (phytonadione) for the treatment of hypoprothrombinemia or hemorrhage, and folic acid for the treatment of megaloblastic and macrocytic anemias.

The following are NOT COVERED, unless specified otherwise:

- Therapeutic devices or appliances, including hypodermic needles, support garments, ostomy supplies, durable medical equipment, and non-medical substances regardless of intended use.
- Any over-the-counter medicine, unless specified otherwise.
- Any nutritional supplements, unless specified otherwise.
- Blood serum (i.e., albumin, plasma)
- Experimental medicines do not have NDC numbers and therefore, are not covered.
- Select Medical Devices and Artificial Saliva products
- Scar Products under the following GPIs
- GPI 4 9093\*\*\*\*\* \*Scar Treatment Products\*\*
- GPI-8 90970070\*\*\*\*\* \*Silicone
- GPI-6 973070\*\*\*\*\* \*Scar Treatments\*\*\*
- GPI-10 9094990250\*\*\*\* \*Silicone-Vitamin E
- Miscellaneous Formulations: Select topical analgesics\*, convenience multi-product kits (e.g., allergy kits, DNA collection kits), dermatologicals, otic analgesics and combinations), scar products etc.
- \*Topical analgesics may include (but is not limited to): patches, lotions, creams, ointments, gels, sprays, and solutions containing ingredients (alone or in combination) for the temporary relief of minor aches and muscle pains associated with arthritis, simple backache, strains, muscle soreness and stiffness.
- Unapproved Drug Management Strategy- Exclusion of all new to market unapproved products and certain existing unapproved products that may be marketed contrary to the Federal Food, Drug and Cosmetic Act. Coverage will remain for select unapproved products that are legally marketed or deemed clinically necessary (e.g., because no alternatives exist). Please note: products may be deemed legally marketed based on information reported by the manufacturer to the Centers for Medicare and Medicaid Services (CMS) and utilized by CMS in making a determination of coverage under the Medicaid program.

- Drugs covered under Medical Benefits (i.e. Spinraza, Brineura)
- Drugs generally not suitable for coverage under a pharmacy/outpatient prescription drug benefit, as determined by Caremark from time to time (e.g., Spinraza, Brineura, CAR-T therapy). A drug which must be infused into a space other than the blood will generally be excluded from the prescription drug benefit. Exceptions may be made for certain drugs, as otherwise noted in this document.
- Prescription digital therapeutics, unless otherwise specified. Prescription digital therapeutics are software programs or applications intended to prevent, manage, or treat a medical disorder or disease. A prescription is required to access these tools. In the event that a PDT will be covered, Plan will receive advance notice and have the opportunity to opt out.

• **Notations:**

CVS Caremark maintains a list of unbreakable packages and medications requiring extended day supply dosing. These medications will bypass a plan's standard day supply limitations as necessary to allow fills of these medications. Refills for these medications would still be subject to a plan's specified refill threshold percentage (I.E. a member must still use up 80% of their previous fill before a refill will be allowed, subject to the refill threshold percentage set by the plan).

## Value Formulary

Value Formulary is a managed formulary approach that provides significant value for clients and members. VF is clinically comprehensive and covers all disease states and allows for simplified copay tier arrangements. This solution also features robust member outreach to help transition members to lower-cost therapies and supports Health Care Reform. VF is designed to be a two-tier benefit plan that includes all generics and the most clinically-effective brands as determined through robust clinical evidence.

Value Formulary is meant to be a full replacement program (it replaces all utilization management and plan attributes). If client wishes to retain or add any UM that is not in conflict with Value Formulary, these attributes must be identified or they will not be implemented.

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

☐ NOT electing value formulary

## Optional Preventative Drug Coverage

If electing CVS Caremark's recommendations for Medication Assisted Treatment (MAT) as a preventive service, the Client understands that this drug category is NOT required under the Affordable Care Act (as described in the Health Care Reform preventive service section) to be offered at \$0 cost share. This is an optional plan design edit being recommended by CVS Caremark. Client acknowledges that CVS Caremark may elect to amend its list of MAT-related recommendations at any given time to conform with new guidance and/or recommendations. CVS Caremark will use commercially reasonable efforts to notify Client of any changes to its list of recommended MAT at least 30 days before the changes become effective. The current recommendation consists of the following generic medications: Buprenorphine sublingual tab, 2 mg; 8 mg; Buprenorphine-naloxone sublingual tab 2 mg-0.5 mg; 8 mg-2 mg Naltrexone tablet 50mg

**Plan(s):BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

### **MEDICATION ASSISTED TREATMENT\* (MAT) FOR SUBSTANCE ABUSE DISORDER**

Add \$0 cost share optional category to coverage with claims bypassing all accumulations.

☐ NOT electing MAT for substance abuse disorder

*\*CVS Caremark standard: coverage of generics effective 1/1/2019.*

*Opting into this strategy will not alter drug coverage edits currently in place. Please note that if there are any plan design changes in the MAT program within UM this will result in the need for updated signed documentation or Care Instructions.*

## NPI/DEA Validation

NPI/DEA validation is used to validate submitted NPI or DEA or combination of both for adjudication as a CVS Caremark standard.

## ♥ Member Experience

### Member Cost Sharing

**Plan(s): BENSLEM PLAN1 OC1, BENSLEM PLAN2 OC3, BENSLEM PLAN4 POS, BENSLEM PLAN5 OC2**

## Accumulations

*Plan(s): BENSALEM PLAN1 OC1, BENSALEM PLAN4 POS, BENSALEM PLAN5 OC2*

**INDIVIDUAL OR FAMILY COVERAGE WITH NO DEDUCTIBLE AND INTEGRATED, EMBEDDED MAXIMUM OUT-OF-POCKET**

Arturo is enrolled as an Individual Only in the plan.

Arturo will pay the member cost share for prescriptions until the \$3500.00 Maximum Out-of-Pocket is met in combined medical and prescription claims. Future medical and prescription claims will cost \$0 until the accumulation benefit period restarts

Chen is enrolled for Family coverage in the plan.

Chen and family will pay the member cost share for prescriptions until the \$7000.00 Maximum Out-of-Pocket is met in combined medical and prescription claims. Future medical and prescription claims will cost \$0 until the accumulation benefit period restarts. If Chen's dependent Li meets the individual maximum out-of-pocket of \$3500.00 in combined medical and prescription claims before the family maximum out-of-pocket is met then Li will pay \$0 for prescriptions until the accumulation benefit period restarts.

*Plan(s): BENSALEM PLAN2 OC3*

**INDIVIDUAL OR FAMILY COVERAGE WITH NO DEDUCTIBLE AND INTEGRATED, EMBEDDED MAXIMUM OUT-OF-POCKET**

Arturo is enrolled as an Individual Only in the plan.

Arturo will pay the member cost share for prescriptions until the \$5000.00 Maximum Out-of-Pocket is met in combined medical and prescription claims. Future medical and prescription claims will cost \$0 until the accumulation benefit period restarts

Chen is enrolled for Family coverage in the plan.

Chen and family will pay the member cost share for prescriptions until the \$10000.00 Maximum Out-of-Pocket is met in combined medical and prescription claims. Future medical and prescription claims will cost \$0 until the accumulation benefit period restarts. If Chen's dependent Li meets the individual maximum out-of-pocket of \$5000.00 in combined medical and prescription claims before the family maximum out-of-pocket is met then Li will pay \$0 for prescriptions until the accumulation benefit period restarts.

## Programs/Products

*Plan(s): BENSALEM PLAN1 OC1, BENSALEM PLAN2 OC3, BENSALEM PLAN4 POS, BENSALEM PLAN5 OC2*

**SCRIPT SYNC\***

Meera and dependents can work with a pharmacist team to align 30-day maintenance medication prescriptions to be picked up at a single visit and avoid multiple trips to the pharmacy throughout the month.

*\*Applies to all CVS Retail pharmacies only.*

## Reimbursements

**CLAIM PROCESSING REIMBURSEMENT - PAPER**

*Plan(s): BENSALEM PLAN1 OC1, BENSALEM PLAN2 OC3, BENSALEM PLAN4 POS, BENSALEM PLAN5 OC2*

If Cho forgot her insurance prescription card at a Retail pharmacy, she can file a paper claim to be reimbursed by providing a copy of the receipt. See Claim Processing Reimbursements section for more plan details.

## **CLAIM PROCESSING REIMBURSEMENT - GOVERNMENT**

### ***Plan(s): BENSALEM PLAN1 OC1, BENSALEM PLAN2 OC3, BENSALEM PLAN4 POS, BENSALEM PLAN5 OC2***

For members who submit any type of government claims, the government agency submits these claims and CVS Caremark will process these claims the same matter as a member-submitted claim. CVS will handle these claims, unless otherwise specified and the government submitted claims will be handled directly by the client.

#### **Notes applicable to all government claims**

- Government agencies, such as State Medicaid agencies, the Veteran's Administration ("VA"), Department of Defense ("DOD") and Indian Health Services ("IHS") are entitled by law to seek reimbursement from healthcare plans for benefits provided to the Plan's members. The government agency submits these claims as an assignee of the plan member, and CVS Caremark generally processes these claims in the same manner as member-submitted claims. Note: there may be exceptions to this general rule for Medicaid Plans and Medicare D Plans.
- Clients may choose to have CVS Caremark process government-submitted claims on their behalf, in which case, they must authorize CVS Caremark to do so below and choose to cover member-submitted paper claims in the preceding section. If the client does not authorize CVS Caremark to process government-submitted claims on its behalf, the government agency may submit such claims directly to the client. Ordinarily, clients plan design edits are taken into account in the processing of government-submitted claims to determine the appropriate reimbursement, if any, to the government agency. Note: some plan design edits are not applicable to the processing of government-submitted claims.
- For quantities exceeding the allowed plan amount, the claim will be prorated or not prorated based on client parameters but must match proration rules for member submitted paper claims.
- All benefits are assumed to be assigned to the respective agency from the beneficiary, and the plan must accept the assignment of benefits to the government.
- Claims will be paid up to 3 years from the original date of fill or as otherwise required by law. Claims may not be denied on the bases of the format of the claim or failure to present proper documentation at the point-of-sale.

#### **Parameters for claims received from the VA, DOD, IHS or State Pharmaceutical Assistance Program (SPAP)**

- All VA, DOD, IHS & SPAP claims must be processed as in-network. Therefore, no out-of-network penalties may be applied.

#### **Parameters for claims received from state Medicaid agencies**

- Medicaid claim processing will pay the lesser of the amount the Medicaid agency paid for the prescription or the benefit amount allowed by the plan design.
